

OPERATIONS/ITS PLAN

Operations Goals

- Improve safety, person throughput, and travel time reliability (predictability)
- Provide travelers with options

Potential Strategies

- Sharing real-time information, including park & ride space availability
- Active lane management during and after construction
- Displaying travel times
- Effectively managing incidents through video surveillance
- Upgrading fiber optic communications network
- Enabling connected/automated vehicles in the future

Operations Working Group

- Concept of operations and technical requirements under development

ACTIVE TRAFFIC MANAGEMENT CONCEPTS
